

Sample Test Paper

1. A package without body is possible.(T/F)ans:T
2. Subprograms have equal scope as variables.(T/F)
3. Can a cursor be closed for two times(T/F)ans:F
4. Transaction function can be used in trigger(T/F)ans:F
5. DDL can be used in trigger(T/F)ans:T
6. A trigger name can have the same name as that of its base table name(T/F)ans:T
7. In a PL/SQL block a variable and a table name both are same then which will get highest precedence.
8. Is PL/SQL reserved words can be used in SQL Ans:It can be used with quotation.
9. How to write a single quote in SQL
i)"" ii)''' iii)'"
10. Can a labeled go to statement goto the inner loop(T/F)ans:F
11. Which are the mandatory parts of PL/SQL procedure.
12. SQL%ISOPEN for implicit cursor is always evaluateto false(T/F)ans:T
13. Any variable not declared in the declare part assigns value
14. For cursor %NOTFOUND and for PL/SQL
NO_DATA_FOUND(exception)gives the same result.(T/F)ans:T
15. If exception occured in the exception then it will
i)raise in the same block
ii)raise in the outer block
iii)not raise in the same block
16. PMON command is used for_____
17. Select * from emp where emp_no=1;
If exist then dbms_output_putline(".....")
else dbms_output_putline("error")
end if;
what will be the output choices are there
18. If for Update lock is absent then will there any error in the following statement
select * from emp;
choices are there.ans is there will no error
19. Can a inbuilt exception be redefined by a user(T/F)ans:F
20. var table.value%type;
var=5;
insert into table(value) values(var);
for var in reverse 4..6
loop
insert into table(value) values(var);
end loop;
insert into table(value) values(var);
i)56545
ii)56544(ans)
iii)56555
iv)65445
21. can a function overloaded differed by
i)the no of parameters and its type only

- ii)their return type
 - iii)
 - iv)
22. Raise_application_error is used for.....
23. In SQL SGA area the parser tree and exceptions are stored which are used for multiple applications(T/F)ans:F
24. PRAGMA_EXCEPTION_INIT(mssge,code no).....
25. exceptions are executed at
- i)compile time
 - ii)runtime(ans)
26. When a subprocedure will be declared within a procedure?
- i)at the end of the declaration
 - ii).....
 - iii)....
27. Record1 and record2 are declared.each record has two fields with same datatypes.
- i)Record1:=Record2;
 - ii)Record1.field1:=Record2.field1;
 - iii)Record1.field2:=Record2.field2;
- a)only i is legal
 - b)only ii and iii are legal
 - c)all are legal
 - d)none is legal
28. Trigger syntax declaration without the option for each row is legal(T/F)ans:T
29. Tablespace contains physical data(T/F)ans:T
30. Rowid is a pseudo column of every oracle table(T/F)
31. Lpad and Rpad have default pad character is space(T/F)
32. When %ROWCOUNT is 0 what will happen
- i)NO_DAT_FOUND exception will raise
 - ii)%FOUND will be false
